CaptiveXS Gateway Solution

A Cloud Managed Unified Platform, deployed as an on-premise gateway, for essential WiFi services and monetization.

FEATURES

Captive Portal with Social Login

Show EULA as well as have users login with their social login. View all user demographics analytics on the cloud dashboard.

Content Filtering

Filter websites based on category and domain. Block bandwidth heavy applications eg. Youtube.com. or categories such as porn, violence etc.

Content Insertion

Engage users beyond Captive Portal by inserting any kind of content during the users' browsing session.

Captive Portal

IoT Discovery & Security

Discover & manage all IoT devices in the network. Quarantine, ByPass or Watch suspicious or unknown devices in the network.

User Management

Control bandwidth and user session. Manage user session timeout as well as have bandwidth control per user enabled with this feature.

Deep User Analytics

Collect all user analytics and provide info through dashboard. Know your customers better and better target them.

Content Insertion

Cloud Management of All Features

Access all features through CaptiveXS cloud dashboard. Manage all locations and configuration and see analytics from a single login.

Deployment

The deployment for the CaptiveXS gateway has to be in-line and on-premise. Based on the peak concurrent users, the customer can either deploy a Raspberry-Pi (for 100 concurrent users or less) or a VM based solution for large-scale deployment. Please refer to the below diagram for further details:

RaGaPa Cloud Dashboard
Captive Portal, Web Security,
User Management,
Ad/Campaign Management

Configuration Pulled From Cloud

Internet

Access Point

LAN (Eth1)   WAN (Eth0)

All Internet Traffic

RaGaPa-Pi or RaGaPa Appliance as Gateway, DHCP and DNS

Firewall/Router

Pricing

The pricing for CaptiveXS Gateway solution is based on peak concurrent users and has two tiers:

SMB (Small & Medium Business) Pricing

This is annual subscription based for 250 concurrent users or less and pricing is available on our website at: www.captivexs.com/#pricing

Enterprise Pricing

This is a capex based pricing with one-time license cost and annual recurring support/maintenance. Prices available on request.

Ideal Deployment Scenarios

- Solution is agnostic of network equipment and hence no special requirements for deployment
- On-prem Gateway with all-in-one features with security and monetization
- Small/Medium or Large location with less than 10 sites
